SAIG-OP (800D-1)

MEMORANDUM FOR U.S. Army Inspector General Enterprise

SUBJECT: Interim Guidance on marking Inspector General (IG) Records and other work products as Controlled Unclassified Information (CUI)

1. Reference. Deputy Chief of Staff, G-2 Memorandum, 27 August 2020, subject: Implementing Guidance for Department of Defense Instruction 5200.48, Controlled Unclassified Information.

2. The protection of unclassified information that is vital to DOD programs, systems, and readiness has become paramount in this advanced technical and social media age. The transition to the CUI program affords us additional protections from foreign and domestic adversaries. As part of the overall Operational Security (OPSEC) and Information Security (INFOSEC) effort across the department, the IG Enterprise will conduct an interim CUI transition on how to mark IG records and other work products.

3. Until further notice, please use the enclosed guide containing the category markings that we will use until AR 380-5 (Army Information Security Program, 22 October 2019) is updated and the new OSD CUI registry comes on line. In closing, I want to thank you for your stellar service to our great Army and the IG Enterprise. As always, it is your individual actions and decisions that provide the protections needed to deter bad actors and to maintain our readiness.

4. Point of contact for this action is Mr. Steven E. Betson, Security Manger, Operations & Support Division, steven.e.betson.civ@mail.mil or 703-614-2770.
